Career Experience

SaskEnergy & TransGas Inc., Regina, SK, Canada

Sep 2022 – Dec 2022

Enterprise Network Engineer Co-op Student

- Worked with an experienced team and get to know about how crown corporations work together
- Configured and programmed 4G LTE radios, got basic knowledge about other types of equipment that are used in the field for secure and seamless gas transmission
- Solved an inventory problem by implementing a management system instead of manual records
- Fetched and analyzed the real-time readings of the radios like IP address, temperature, voltage, and other important parameters and used data interpretation technique to detect the failure in line which reduced the cost of new devices by 60%
- Designed a logo for an Enterprise network team

Volvere Vibe, India

Jun 2018 – Apr 2021

Project Manager | Web Developer

- Developed an E-commerce website to purchase or rent cameras, lenses, and other accessories related to it using the MVC structure, regular expressions for validation, and admin panel framework which helped the owner to keep track of all records digitally and increased their sale by 10% a month
- Designed and developed various websites and applications based on UI/UX to create a secure and seamless user experience. Used CI/CD method and waterfall methodologies for some projects.
- Appointed as a project manager later based on my progress
- Handled multiple projects parallel with the development and Collaborate with developers and designers to meet the expectations of the client
- Prepared invoices and timelines for the projects and presented them to clients

(n)Code GNFC, GIFT City, India

Jan 2020 – May 2020

Software Developer

- Worked with HR, senior developers, and the managing head to make the onboard process online
- Reduced paperwork, repeated tasks, and manual checking of each and every form
- Worked closely with HR for requirement gathering and to chop it down into features and functionalities of web application to reduce the timeline for whole onboarding process by 2 days
- Based on that, designed the whole front-end, developed CRUD operations, handled the back-end in SQL, used nested validation and implemented regular expressions when needed.
- Generated replica of all the forms using HTML and .NET which can be downloaded with a single click

Education

MSc. Computer Science

May 2021 – Apr 2023

University of Regina • Regina, Saskatchewan, Canada | CGPA – 86.8
